

DO YOU KNOW?

1 in 8 people worldwide lives with obesity, and 1 in 3 lives with hypertension. Among them, 65–78% live with both conditions ^[1].

About 60% of adult populations are unaware they have active heart disease until a major cardiac event occurs ^[2].

About 70% of global deaths are attributed to noncommunicable diseases such as heart disease, cancer, diabetes and chronic respiratory diseases ^[3].

About 12 million deaths before age 70 are linked to lifestyles and behaviours started in youth.

A large study of 500,000 Chinese adults found that adopting healthier lifestyle habits could reduce the risk of dying from noncommunicable diseases by up to 68%.

Understanding your genetic predisposition can be a useful starting point for more informed health and wellness decisions.

Important Information

ORIGENE® identifies selected genetic markers associated with predispositions or increased likelihood of certain diseases, disorders and traits.

A genetic result does not mean that you will develop a disease, nor does it predict when or how severely a condition may occur.

A negative result also does not completely rule out a disease or condition. Lifestyle, environment and behaviour matter too.

ORIGENE® is a genetic screening test, not a diagnostic test. Results should be discussed with your doctor or qualified healthcare professional before making clinical or treatment decisions.

**You know your family history.
But do you know what your DNA
may be telling you?**

Your DNA contains genetic variations that can influence your susceptibility to certain diseases, how your body processes nutrients, how you respond to exercise, and even certain physical and behavioural traits.

ORIGENE® helps you understand them.

WHAT IS ORIGENE® ?

A GENETIC SCREENING TEST FOR A MORE PERSONAL VIEW OF HEALTH.

ORIGENE® screens your DNA for known genetic markers associated with health, wellness, physical characteristics and behaviour.

ORIGENE® gives you a clearer picture of your genetic strengths, weaknesses and predispositions so you can make more informed choices about your health and lifestyle.

What can ORIGENE® tell you?

ORIGENE® explores genetic factors that may influence 9 key health and wellbeing profiles:

Dermatology
(Skin Health & Aesthetics)

Wellness
(Nutrition & Metabolism)

Sports & Fitness
(Exercise & Physical Recovery)

Allergy
(Immune & Body Response)

Behavioural & Physical Traits
(Lifestyle & Appearance)

Cardio & Metabolic
(Heart & Systemic Health)

Oncology
(Cancer-related Risk)

Neurology
(Brain & Neurological Health)

Childhood-Onset Diseases
(Children Wellness)

ORIGENE® also provides an
AI-driven Wellness Guide.

It tailored to your genetic profile, helping you make smarter everyday health and lifestyle choices.

Wellness Guide

How It Works

1

ORDER

Get your **ORIGENE®** Genetic Screening Test.

2

COLLECT

Collect your DNA using a simple buccal swab or saliva sample kit and send to us.

3

TEST

Your DNA is extracted and screened for selected genetic markers.

4

REPORT

Your results are analysed and provided in an easy-to-understand report.

5

TAKE ACTION

Discuss your results with your doctor or wellness professional and use the information to guide your next steps.

Your Health Journey,
Starts with Your Genes.
ISO 9001 Certified
